Yahav Nir Software Engineer

yahavnirr@gmail.com | 050-2107076 | Tel Aviv | linkedin.com/in/nir-yahav | github.com/nyahav

SUMMARY

Software Engineer experienced in optimizing distributed systems in cybersecurity environments. Focused on high-availability backend services, system reliability, and clean design.

WORK EXPERIENCE

Software Engineer, *PTBox* 06/2025 – Present

- **Designed a core orchestration** service that tripled tool throughput via a custom weighted scheduler, reducing scheduling latency from 200ms to 5ms using in-memory caching.
- **Improved system stability** by building a hybrid admission controller, utilizing priority-based preemption, reducing container OOM crashes by ~90% with **Docker** watchdog recovery.
- **Co-led migration from a legacy SQL** architecture to a **hybrid SQL/NoSQL** model, redesigning data schemas to preserve cross-service consistency and eliminate query bottlenecks.
- **Centralized authentication** across **Python FastAPI and Kotlin** microservices via **Keycloak (OAuth2 + PKCE)** to establish secure identity management and role-based access control.

Technologies: Python (FastAPI) ▪ Java ▪ Kotlin ▪ React ▪ TypeScript ▪ RabbitMQ ▪ Docker

Support Engineer (Short-term Contract), *Base44* 02/2025 – 06/2025

- Diagnosed **API** and **integration** failures across **React** and **JavaScript**, tracing recurring patterns to their root causes and escalating fixes with reproducible findings.

Data Analyst (Short-term Contract), *HR Signal* 06/2024 – 02/2025

- **Analyzed large-scale datasets in BigQuery SQL** and built Python-based statistical automation that reduced repetitive manual reporting tasks by 15%.

NOC Engineer, *Check Point Software* 12/2022 – 02/2024

- **Troubleshot Linux and networking systems** by leveraging log analysis and firewall configurations, and redesigned onboarding to cut integration time by 30%.

EDUCATION

B.Sc. in Computer Science, *The Open University of Israel* 2020 – 2024

TECHNICAL SKILLS

Languages
Kotlin ▪ Java ▪ Python (FastAPI) ▪ JavaScript ▪ TypeScript

Backend
Distributed Systems ▪ API Design (REST) ▪ Event-Driven Architecture

Data
SQL ▪ PostgreSQL ▪ MySQL ▪ NoSQL ▪ MongoDB ▪ BigQuery

Cloud & Infra
Docker ▪ RabbitMQ ▪ GCP ▪ AWS ▪ Kubernetes ▪ Helm ▪ Terraform ▪ GitHub Actions

Other
Linux ▪ Networking ▪ Agile ▪ Git ▪ Unit & Integration Testing ▪ Prometheus ▪ Grafana ▪ Claude Code

PROJECTS

AI Multi-Agent Customer Support Platform

- Built a **LangGraph** multi-agent workflow using FastAPI and **Amazon Bedrock** for context-aware **RAG**, sentiment analysis, confidence-based routing, and human-in-the-loop escalation via **SageMaker A2I**.
- Validated local **Kubernetes** deployment using Helm, integrated **Prometheus/Grafana** observability, **Terraform**-based **AWS EKS** infrastructure, and **GitHub Actions CI**.

MILITARY SERVICE

Combat medic and fighter, *Palsar 7 Reconnaissance Unit*
Trained soldiers in high-pressure scenarios, building teamwork and adaptability.
